

# Aluminum Brick Edging

*When you need to provide a strong edge restraint for your paver installations  
Aluminum Brick Edging by Europa Landscaping Products is your solution!*

- ❑ “easy slide” aluminum connectors provide a solid solutions for joining pieces together. No more fumbling with little screws or clips that easily come off.
- ❑ “easy slide” aluminum connectors provide rigid lateral support at connection point when joining one piece to another.
- ❑ “easy slide” aluminum connectors save time and time is money.
- ❑ Semi circle cut-out allows for easy shaping of Brick edging for 90 degrees bends for inside and outside corners without overlap.
- ❑ Very flexible, no problems for curves.
- ❑ Can be used for artificial grass applications (available in green)
- ❑ Reversible design feature allows for ease of installation on either side of paver.
- ❑ “Fins” on either side of nail head allow for edging to be installed under paver without nail head interfering with paver.
- ❑ will not rust, or crack
